clean air

ASPRA[®] AURA SMART

Particle, gas and odour purification

Product Description

The ASPRA Aura Smart is a 4-in-1 system:

- Effective air purification against all aerosols and particle PM10, PM2.5, PM1 and ultra-fine particles
- Automatic air cleaning tailored to the air quality in the room
- IoT air quality monitor for particulate matter (PM2.5) on the device as via an app.
- Filtration of gases and odours

The ASPRA Aura Smart air purifier controls itself based on the air pollution (PM2.5) in the room. This way you always enjoy optimal air quality allowing you to breathe clean air. The system has a CADR of 400 m3/hour and is recommended for a room up to 200 m3.

An Auto, Turbo, Sleep, Sense and a Custom modes are available. With the Custom mode you can set a weekly schedule of the appliance for operation based on time slots and system speed/mode.

An IAQ LED indicates the air quality on the air purifier. The device notifies you when the filters need to be replaced. Filters are therefore never replaced too early or too late. The air quality, actual service life of the filters, flow rate, weekly planning and possible interferences can be monitored and set by connecting the ASPRA Aura Smart to the WiFi network. Via the dedicated App you can view the data online, view all your air purifiers and sensors, control and schedule the air purifier remotely.

Benefits

- Captures air pollution inside the device
- Filtration efficiency equal to HEPA class
- Deactivated pathogen as viruses inside the device
- Quiet operation – the quietest in its segment
- High CADR
- Integrated air quality sensor
- Optimized air quality by controlled air purification
- Insight in IAQ through online sensor data
- Online control of the ASPRA air purifier
- Mobile air purification (plug-and-play)
- Low energy consumption
- App and API available for your own visualization

Removes
99,97%
of Viruses and
Bacteria from the Air

Product Details

Order code	VFA-010101
Settings	Auto, sleep, custom, turbo. sense
Capacity	400 m³/h
Power	20 W
Sound	38 dB
Efficiency	99,97%
Measurements	652 x 297 x 400 mm
Weight	16 kg*
Material	Galvanized steel
Air cleaning technology	ASPRA ESP&F, gas adsorption ACF
Power input	~230 V/ 50 - 60 Hz
Colour	White (RAL9016) other colours or custom designs upon request

Included	Collector, Active Carbon Filter
Regulation	Decentral and via App, manual and/or automatically
Installation	Standing, on floor or mounted to wall

Collector Aura	C S400 EF110
Active Carbon Filter Aura	ACF S400
Wall Mount Horizontal Aura	VFA10027
Wall Mount Vertical Aura	VFA10125
Floor Stand Aura	VFA10063
Cleaning Brush Aura	VFA10046
